**Subject:** Mining Committee Call Notes

Hi,

Here are brief notes from the July 14 mining committee call.

1. Discussion on planning for the petroleum transportation webinar.
  - Alliance for the Great Lakes and Great Lakes Commission are confirmed as speakers. Enbridge is very interested in presenting and should confirm in the near future. The scope of the Enbridge presentation is still being defined.
  - Presentations will be 20 minutes each with time for questions.
  - Additional work on logistics will be done. Need to identify a suitable webinar platform.

## 2. Mining updates

- Forest Service has decided to proceed with the land exchange with PolyMet. Some additional work is needed before the exchange can be finalized.
- PolyMet has submitted permit applications for NPDES and water appropriations. Review is ongoing.
- Northshore mine will soon post a re-issuance application for their NPDES permit.
- Lundin Mining Co. has discovered another deposit immediately east of the currently operating Eagle mine. This would increase the life of mining operations north of Marquette.

3. Next mining committee meeting is August 11 at 1 pm central time.

Please contact me with any corrections to the points above or if you would like additional information on these topics.

thanks

esteban
